主旨：有關美國國際貿易委員會107年8月3日公告對自中國大陸進口之鋼架(Steel Racks)反傾銷及平衡稅產業損害調查初步裁定事，請查照並轉知會員廠商參考。

說明：

一、依據駐美國代表處經濟組107年8月3日經美字第1070000964號函（影本如附件）辦理。本局107年7月17日貿雙一字第1077020681號函諒達。

二、請貴會轉請相關會員廠商妥為注意，切勿涉入旨揭中國大陸涉案產品規避美國反傾銷或反補貼措施之行為（例如進口中國大陸成品卻偽造我國產製，或進口半成品微型加工或組裝後充作我國產品出口等違規轉運行為），俾避免我國產品因前述行為遭致美國反傾銷或反規避調查。

::USITC Votes to Continue Investigations Concerning Steel Racks from China

August 3, 2018

News Release 18-095

Inv. No. 701-TA-608 and 731-TA-1420 (Preliminary)

Contact: Peg O'Laughlin, 202-205-1819

USITC VOTES TO CONTINUE INVESTIGATIONS CONCERNING STEEL RACKS FROM CHINA

The United States International Trade Commission (USITC) today determined that there is a reasonable indication that a U.S. industry is materially injured by reason of imports of steel racks from China that are allegedly sold in the United States at less than fair value and subsidized by the government of China.

Chairman David S. Johanson and Commissioners Irving A. Williamson, Rhonda K. Schmidtlein, and Jason E. Kearns voted in the affirmative. Commissioner Meredith M. Broadbent did not participate in these investigations.

As a result of the Commission's affirmative determinations, the U.S. Department of Commerce will continue with its antidumping and countervailing duty investigations concerning imports of this product, with its preliminary countervailing duty determination due on or about September 13, 2018, and its preliminary antidumping duty determination due on or about November 27, 2018.

The Commission's public report *Steel Racks from China* (Inv. Nos. 701-TA-608 and 731-TA-1420 (Preliminary), USITC Publication 4811, August 2018) will contain the views of the Commission and information developed during the investigations.

The report will be available after September 10, 2018; when available, it may be accessed on the USITC website at: *http://pubapps.usitc.gov/applications/publogs/qry_publication_loglist.asp (http://pubapps.usitc.gov/applications/publogs/qry_publication_loglist.asp)*.

FACTUAL HIGHLIGHTS

Steel Racks from China
Investigation Nos. 701-TA-608 and 731-TA-1420 (Preliminary)

Product Description: A steel rack, sometimes referred to as a "storage rack," is a structure consisting of the following hot-rolled or cold-formed steel structural components: (1) vertical columns connected by braces, (2) load-bearing horizontal beams, and (3) locking devices to secure the beams to the columns. Certain types of steel racks may also include movable components, such as rails, wheels, rollers, tracks, channels, carts, or conveyors. Steel racks offer strength and stability for storing heavy loads in readily accessible rack configurations. Hence, they are utilized for short- or long-term holding of products or materials in warehouses, order-fulfillment and distribution centers, big-box retail stores, and manufacturing facilities.
