STEEL RACKS FROM CHINA INJURE U.S. INDUSTRY, SAYS USITC

The United States International Trade Commission (USITC) today determined that a U.S. industry is materially injured by reason of imports of steel racks from China that the U.S. Department of Commerce (Commerce) has determined are subsidized and sold in the United States at less than fair value.

Chairman David S. Johanson and Commissioners Rhonda K. Schmidtlein, and Jason E. Kearns voted in the affirmative. Commissioners Irving A. Williamson and Meredith M. Broadbent did not participate in these votes.

As a result of the USITC's affirmative determinations, Commerce will issue antidumping and countervailing duty orders on imports of this product from China.

The Commission's public report *Steel Racks from China* (Inv. Nos. 701-TA-608 and 731-TA-1420 (Final), USITC Publication 4951, September 2019) will contain the views of the Commission and information developed during the investigations.

The report will be available by September 27, 2019; when available, it may be accessed on the USITC website at: *https://www.usitc.gov/commission_publications_library* (https://www.usitc.gov/commission_publications_library).

FACTUAL HIGHLIGHTS

Steel Racks from China
Investigation Nos. 701-TA-608 and 731-TA-1420 (Final)

Product Description: A steel rack, sometimes referred to as a "storage rack," is a structure consisting of the following hot-rolled or cold-formed steel structural components: (1) vertical columns connected by braces, (2) load-bearing horizontal beams, and (3) locking devices to secure the beams to the columns. Certain types of steel racks may also include movable components, such as rails, wheels, rollers, tracks, channels, carts, or conveyors. Steel racks offer strength and stability for storing heavy loads in readily accessible rack configurations. Hence, they are utilized for short- or long-term holding of products or materials in warehouses, order-fulfillment and distribution centers, big-box retail stores, and manufacturing facilities.
